

NGUYEN DUC TRUNG

FRONTEND DEVELOPER

Ho Chi Minh City, Vietnam • 0395720040 • trungzero4869@gmail.com • github.com/DucTrung0704

PROFILE

Front-end Developer with hands-on experience building responsive web applications using React and Next.js. Experienced in healthcare workflow systems, REST API integration, role-based access control, and real-time updates with Socket.IO. Completed a 3-month Front-end Developer internship at FPT Software and contributed to e-learning and healthcare projects.

EXPERIENCE

FPT SOFTWARE | Frontend Developer Intern | Sep 2024 – Dec 2024

Cursus E-Learning

- Technologies Used: ReactJS · Javascript · CSS · Axios · Redux
- Developed responsive UI for Enrolled Courses, Payment, and Course Content using React, Redux, CSS, and Axios.
- Independently implemented the Enrolled Courses and Course Content features from development to integration.
- Collaborated with an 8-members development team and used GitLab for code management, merging, and collaboration.
- Integrated front-end interfaces with back-end APIs to support course-related user workflows.

PROJECTS

TRIAGEFLOWOPD | Frontend Developer | Jun 2026 – Sep 2026

Patient Flow Management & Coordination Platform

- Technologies Used: Next.js · Zustand · Tailwind CSS · Fetch API · Socket.IO
- Developed the doctor patient-flow workflow, including calling patients, managing examinations, creating clinical service orders, reviewing results, prescribing medication, and completing consultations.
- Built service-order interfaces supporting laboratory tests, medical procedures, and diagnostic services, including blood tests, wound care, and X-ray services.
- Implemented role-based access control (RBAC) using route guards, middleware, and permission-based UI rendering.
- Integrated REST APIs using Fetch and implemented real-time patient queue updates using Socket.IO for consultation-room displays.
- Contributed to administrative functions and access management across different system roles; deployed the front-end application to Vercel.
